Melbourne, AU | Open to Relocation | 0423 169 570 | dabreoshonil@gmail.com | [LinkedIn profile](#)

SUMMARY

- A **Data Engineer and Data Analyst** with **5+ years** delivering scalable ETL pipelines for financial services (SGFleet) using Python, SQL, Databricks, and Azure Synapse ensuring single source of truth migration and self-serve business intelligence.
- **Single Source of Truth Migration:** Engineered Databricks pipelines consolidating 50K+ SAP contract records into unified data layers achieving 98% reconciliation accuracy across operations teams (finance/distribution/underwriting).
- **Data Platform Governance:** Implemented automated quality frameworks by collaborating with UK Data Engineering practices in maintaining governance standards.
- **Self-Serve BI Delivery:** Delivered Power BI dashboards with RLS governance enabling ad-hoc analysis for Sales, Finance, and Operations teams achieving 32% operational efficiency gains.
- **Stakeholder Collaboration:** Led cross-functional teams to translate complex data requirements into scalable platform solutions across operations teams aligned with global architectural standards.
- Hands-on Modern Stack: Azure Synapse/Databricks/SQL/Python expert delivering data platform infrastructure with proven success migrating legacy systems to cloud-native lakehouse architectures.

TECHNICAL SKILLS

- **Core Data:** SQL | Python | Databricks | Azure Data Factory | Azure Synapse | ETL/ELT Pipelines | Data Quality Governance | Data Warehousing
- **Cloud Stack:** Azure Data Factory | Apache Spark | Git/Azure DevOps | CI/CD Pipelines | Data Lineage Tracking
- **Business Intelligence:** Power BI (DAX/RLS) | Self-Serve Analytics | Stakeholder Requirements
- **Enterprise Systems:** SAP Integration | Jira | Confluence | Agile Methodologies | UAT Testing
- **Domain Expertise:** Financial Services Analytics | Cross-Functional Collaboration

EXPERIENCE

SGFLEET (Financial Services - Vehicle Leasing)

MELBOURNE, VIC

Data Analyst/Engineer

May 2024 – Present

Single Source of Truth Migration:

- Engineered pipelines by consolidating SAP contract data across 50K+ assets into Databricks for unified data layers achieving 98% reconciliation accuracy.
- Migrated legacy SQL Server processes to Databricks lakehouse reducing processing time 45% while establishing data lineage tracking between platform layers.
- Designed scalable ETL workflows from source systems to primary data layer enabling self-serve Power BI access for stakeholders.

Data Platform Governance:

- Implemented automated data quality frameworks monitoring pipeline health ensuring 95% accuracy for executive reporting.
- Collaborated with UK Data Engineering practices by defining governance standards that cut manual reconciliation by 25% across platform layers.
- Established Azure DevOps CI/CD pipelines for version tracking across different workflows.

Stakeholder Analytics Delivery:

- Delivered Power BI dashboards with Row Level Security (RLS) governance to track pricing KPIs by supporting ad-hoc analysis across operations teams.
- Translated unclear business requirements into actionable insights and executive presentations influencing pricing strategy.

WOOLIESX (Retail Operations)

MELBOURNE, VIC

Data Analyst/Engineer

September 2022 – March 2024

Data Pipeline Engineering:

- Built BigQuery ETL pipelines processing 5M+ inventory records creating unified data layers to support real-time distribution analytics across 20+ categories.
- Automated scheduled data refreshes ensuring 20% improved pipeline reliability for merchandising stakeholder reporting.
- Designed dimensional models optimizing query performance by 25% for cross-regional inventory analysis.
- Implemented data lineage tracking across supply chain sources enabling audit compliance.

Self-Serve BI Implementation:

- Developed Power BI dashboards to enable self-service KPI analysis reducing stockouts by 15% through governed access across regional centers.
- Conducted stakeholder workshops defining data requirements achieving 100% dashboard adoption.
- Built statistical forecasting models improving demand prediction accuracy by 12%.

FORD MOTOR COMPANY

Data Analyst/Engineer

MELBOURNE, VIC

July 2021 – June 2022

High-Volume Data Processing:

- Engineered Python (Spark) pipelines processing 10M+ telemetry records to build structured data layers achieving 92% vehicle fault detection accuracy.
- Delivered Power BI dashboards consolidating warranty data enabling executive risk assessment across manufacturing operations.
- Automated data quality checks to reduce warranty exposure by 20% through proactive validation.
- Optimized SQL queries cutting report generation time by 30% for stakeholders.

CUREYA

Data Analyst/Engineer

MELBOURNE, VIC

January 2021 – June 2021

Data Analytics Engineering:

- Automated SQL/Python ETL from SAP sources enabling self-service campaign reporting with 100% stakeholder adoption.
- Identified high-value click patterns to improve conversion rates by 18% through behavioral segmentation.
- Built SSRS reports by processing monthly campaign data accelerating insight delivery by 20%.

KEY PROJECTS

End-to-End FMCG Data Engineering Pipeline (Jan 2026): Built Medallion layer pipelines using PySpark to ingest raw CSV data from AWS S3 with historical backfill, daily incremental loads and automated the orchestration using Databricks Jobs. Applied cleaning deduplication and validation rules and designed star schema with fact and dimension tables for analytics ready reporting.

Databricks Migration (SGFleet 2024): Migrated 50K+ SAP records to single source of truth cutting reconciliation cycles by 45%.

Forgith Pharmaceuticals Sales Dashboard (2024): Developed a Power BI dashboard to track/forecast revenue across channels, and product classes optimizing sales strategies and operational efficiency.

Financial Risk Dashboard (SGFleet 2025): Built Power BI dashboard analyzing lease performance across business portfolio.

Inventory Data Lakehouse (WooliesX 2023): Unified 5M+ records enabling distribution forecasting analytics.

EDUCATION & OTHER

RMIT UNIVERSITY

Master of Data Science

MELBOURNE, VIC

March 2020 – December 2021

ST. FRANCIS INSTITUTE OF TECHNOLOGY

Bachelor of Engineering (Computer Science)

MUMBAI, INDIA

July 2016 – June 2019

CERTIFICATIONS: Databricks Data Engineer Associate | ANZ Virtual Internship | PowerBI Essential Training | SQL: Data Reporting and Analysis | Excel Statistics Essential Training | Tableau Essential Training

HOBBIES & INTERESTS: Programming, Cricket, Reading, Volunteering
